**OCEAN AIR****LAVENDER****NEW AIR FRESHENERS**

We are pleased to announce not one but **two** new additions to our range of air-freshener detergents.

**OCEAN AIR** – A beautiful fresh new fragrance.

**LAVENDER** – This traditional favourite has made a resurgence in recent times, so we thought it would be desirable in a commercial air freshener.

Both of these new air-fresheners are formulated with premium surfactants which attack and disperse soilage matter and strong perfume extracts that cling to surfaces and re-odorise throughout the day.

OCEAN AIR and LAVENDER are ideal for washing and mopping all hard surfaces including polished floors, tiled areas, fittings, glass and walls.

There's no doubt a change of fragrance from time to time reminds building occupants that you have been in there keeping the place clean and tidy.

With our expanded range we can offer a fragrance to suit most preferences, and a wider choice to rotate between if that's how you like to operate.

Both these products will be green in colour to form part of our Colour Coded Cleaning System No. 6 range.

**REMINDER**

Our other recently released products;

**CITRA-MIST** – 'Earth Friendly' Spray & Wipe Cleaner. This has become a very popular product, not only because it is a green cleaning product but it has a zesty lemon fragrance and great cleaning power producing excellent results.

**SEQUAL** – Non-hazardous toilet and urinal cleaner

**GENTEEL** – A powerful and versatile carpet (especially wool) and upholstery cleaner

If you haven't already tried these products why not give them a go? You won't be disappointed.

**FOAMING TRIGGERS**

Ever notice that chemicals run away once sprayed onto the surface being cleaned...well not anymore. Simply use our **'Foaming'** trigger instead of your regular trigger when spraying chemicals onto the surface being cleaned.

Foaming triggers are great for applying product to vertical surfaces where dwell time (the time required for the detergent to react with and dissolve the soil) is needed.

eg. Fresco @ 1:10 on shower walls, tiles and glass.

The advantages in using the foam trigger instead of regular triggers are,

- they lead to less product wastage as it prevents the product from running away once sprayed
- it also prevents 'run marks' where the new solution has run down the surface and rapidly dissolved the soil.

They are definitely worth a try and are actually cheaper than the regular triggers. You can purchase them from us for \$1.65 including GST.

✂ ✂ ✂

**SPILL KITS NOW AVAILABLE!**

For sites where substantial quantities of cleaning chemicals are stored or where products classified as dangerous are stored, spill kits are a 'must-have'.

A chemical spill may pose a danger to cleaners or building occupants, or may harm property or the environment.

Agar can supply this not obligatory item:

The Chemical Spill Kit – 20 litre contains;

MINI BOOM – to contain or divert the spill

PILLOWS x3 – to absorb the spill

ABSORBENT PADS x 4 – to absorb and clean up the spill

ABSORBENT MATS x3 – to absorb and clean up the spill

DISPOSAL BAG – to contain and move the spilt material

All spill kits come with a complete list of instructions. Our retail price for the kit is \$133.71 including GST.

**SAFETY CHARTS**

Every work site should have all the necessary Safety Charts relating to the safe handling and use of chemicals. Agar has two A3 size colour charts that are available 'PROTECT YOURSELF' and 'GOOD PRACTICE', they cover the following points;

**PROTECT YOURSELF!**

- ✓ Wear Personal Protective Equipment
- ✓ Beware of Hazards
- ✓ First Aid
- ✓ Spillages

**GOOD PRACTICE**

- ✓ Never Mix Chemicals
- ✓ Label all Dispenser Bottles
- ✓ Dilute Chemicals Correctly
- ✓ Storage Room

Both these charts are FREE of charge, so why not pick one up today from your nearest office or ask your sales rep for one.
